

Stephen Boileau

Technical Artist | Themed Entertainment | Unity & Unreal Engine

📍 Los Angeles, CA

📞 1 (661) 860-1264

Professional Summary

Technical Artist and CG Generalist with 10+ years of experience delivering **real-time and pre-rendered interactive experiences** for themed entertainment, robotics, and immersive media. Specialized in **Unity (C#)** and **Unreal Engine (C++/Blueprints)** pipelines, with deep expertise in **rendering workflows, automation, character rigging, and tooling**. Proven ability to build scalable, artist-friendly pipelines for **high-resolution output, review media, and cross-platform deployment**, while bridging creative vision and technical execution.

Professional Experience

Super 78 — Los Angeles, CA

Technical Artist & Developer

December 2021 – Present

- Delivered immersive themed entertainment experiences using **Unity3D (C#)** and **Unreal Engine (C++ and Blueprints)**.
 - Designed and maintained **Unreal Engine rendering pipelines** for high-resolution output, review, and client delivery.
 - Built **Python-based automated batch rendering systems** to:
 - Standardize file naming and directory structures
 - Convert outputs into review-friendly formats
 - Reduce manual artist intervention and iteration time
 - Implemented **large-resolution rendering workflows** using **OWL (Off World Live)** for Unreal Engine, supporting high-quality capture for presentations, reviews, and marketing.
 - Integrated **Unreal Engine MetaHuman pipelines**, enabling high-fidelity characters in real-time and rendered outputs.
 - Developed and optimized **cross-platform VR applications** for **Oculus and Meta Quest**, ensuring performance stability across devices.
 - Acted as a technical bridge between creative direction, engineering, and art teams.
 - Created **custom Python and Maya tools** to automate asset preparation, validation, and export.
 - Rigged, skinned, and animated characters in **Autodesk Maya**, optimizing assets for real-time performance.
 - Established and maintained **source control workflows** using **Perforce, Git, and Plastic SCM**.
 - Maintained, refactored, and extended legacy projects while supporting new feature development under tight production schedules.
-

Embodied Inc. — Pasadena, CA

Technical Artist

June 2018 – December 2021

- Prepared and integrated **character rigs and animation assets** for real-time robotic systems.
 - Developed **Python automation tools** to streamline asset processing, validation, and pipeline consistency.
 - Collaborated with engineering, animation, and design teams to align technical solutions with creative and functional goals.
 - Supported the production and ongoing development of **Moxie**, ensuring high-quality character performance and reliability.
 - Improved iteration speed and asset stability through tooling, documentation, and workflow optimization.
-

DeepBlue Worlds — Los Angeles, CA

Junior Technical Artist

February 2014 – June 2018

- Contributed to interactive projects using **Unity (C#)** and **Autodesk Maya**.
 - Focused on character rigging, asset preparation, and gameplay integration.
 - Worked on consumer-facing products including *Dino on My Desk*.
 - Gained hands-on experience across art, code, and real-time engine workflows.
-

Mt. San Antonio College — Walnut, CA

Lab Technician / Teacher Assistant

August 2013 – December 2016

- Assisted professors teaching **Autodesk Maya**, including introductory modeling and game development.
 - Supported students in creative labs using **Maya and Adobe Creative Suite**.
 - Provided technical guidance on 3D workflows and real-time fundamentals.
-

Technical Skills

Real-Time Engines

- Unity3D (8+ years)
- Unreal Engine (Rendering, Blueprints, C++) (1+ year)

Rendering & Capture Pipelines

- Unreal Engine Rendering Pipeline
- OWL (Off World Live) Unreal Plugin
- High-Resolution & Large-Format Rendering

- Automated Review Media Generation

Programming & Scripting

- C# (8+ years)
- Python / PyMEL (6+ years)
- C++ (1+ year)

3D & DCC Tools

- Autodesk Maya
 - Rigging & Skinning
 - Modeling
 - UV Mapping
 - Export & Validation Tools

Source Control

- Git
- Plastic SCM
- Perforce

Platforms

- PC
- VR (Oculus, Meta Quest)
- Cross-platform real-time deployments
- Android
- iOS

Specialties

- Themed Entertainment Pipelines
- Unreal Engine Rendering & Capture Workflows
- Automated Batch Rendering & File Formatting
- Tool Development & Pipeline Automation
- Real-Time Character Workflows
- Performance Optimization
- Cross-Disciplinary Collaboration
- Artist-Friendly Technical Solutions
